

Loading Firmware Upgrade to the DVR/VRX1000

The DVR/VRX1000 can be flash-upgraded in the field by following the simple instructions below:

1. Create a **'Firmware Upgrade'** folder on your computer. Download the Firmware upgrade file from the Futurecom website.
2. Unzip the R1.40 Upgrade file and save the files in this folder.
3. Connect the USB port of the computer to the USB port of a powered up DVR/VRX1000 by using the USB cable.
4. Unzip the Flash Downloader Utility you have downloaded and run the **FlashDownloaderInstall.exe** file. Follow the prompts to install the Flash Downloader utility on your computer.
5. Run the Flash Downloader from the shortcut icon created on the desktop or from the Start→All Programs→Futurecom DVR Flash Downloader.
6. Ensure no other program is trying to use the same USB port.
7. Select **File → Open** and specify the location of the **DVRFirmware.cfg** file in the **'Firmware Upgrade'** folder
8. Press the 'Download' button to start the downloading process and observe the Application messages and progress.
