DVRS
RF Safety Booklet

Document Revisions

Rev	Date	By	Notes & References
R3	September 06, 2017	AJK/SN	Added APX 8500
R4	March 5, 2019	AJK/SN	Updated bystander safe distance rules
R5	January 14, 2020	AJK/SN	Added APX 4500, APX2500 configuration for DVR VHF
R6	February 5, 2020	AJK/SN	Added APX 45000, APX2500 configuration for DVR 700
R7	February 11, 2020	AJK/SN	Added APX 4500, APX2500 configuration for DVR 800
R8	April 9, 2021	JP	Added DVR-LX; cleaned up details of mobiles to be clearer; added in new mobiles APX6500/APX6500Li/APX5500/APX4500/APX2500/APX1500 configuration for DVR VHF, UHF, 700, and 800. Minimum lateral distances

Product Safety and RF Energy Exposure Booklet for Digital Vehicular Repeater Systems (DVRS)

ATTENTION!

Before using this equipment, please read this booklet which contains important operating instructions for safe usage, RF energy control and compliance with exposure limits.

RF Exposure

NOTE:

This equipment has been tested and found to comply with the limits for Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the installation manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

ATTENTION!

Changes or modifications not expressly approved by Futurecom Systems Group, ULC could void the User's authority to operate the equipment.

USA Users: Do not use the DVRS in the frequency band 406.0 – 406.1MHz. This frequency band is reserved for distress beacons.

ATTENTION!

This radio is intended for use in occupational / controlled conditions, where users have full knowledge of their exposure and can exercise control over their exposure to meet FCC limits. This radio device is NOT authorized for general population, consumer, or any other use.

It is the responsibility of the Repeater Operator to ensure that Maximum Permissible Exposure (MPE) limits are observed at all times during repeater transmissions. If this vehicular repeater is used in combination with a separate mobile radio transmitter, the Repeater operator must ensure at all times that no person comes within the MPE distance from the vehicle body to ensure compliance with the FCC/ISED RF energy exposure limits for the general population.

The minimum lateral distance between all possible personnel and the body of the DVRS equipped vehicle must be as specified in Table 1 (Stand-alone DVR/DVR-LX) and Table 2 (DVR/DVR-LX interfaced to a Mobile Radio i.e. DVRS).

Failure to observe the MPE distance exclusion area around the antenna may expose persons within this area to RF energy above the FCC/ISED exposure limit for bystanders (general population).

Stand Alone DVR/DVR-LX (20W) (up to 50% DVR/DVR-LX Tx duty cycle)	Minimum Lateral Distance from Antenna
VHF	101 cm (39.76 inches)
UHF 380-512MHz	93 cm (36.61 inches)
700MHz	105 cm (41.33 inches)
800MHz	109 cm (42.91 inches)

Table 1 Minimum Lateral Distance - Stand Alone DVR/DVR-LX

NOTE:

50% Tx duty cycle is defined as Push To Talk (PTT), 50% Talk - 50% Listen.

Mobile Radio Rated Power (up to 50% Tx duty cycle)	Minimum Lateral Distance from Vehicle Body
DVRS with <7 Watt XTL Mobile Radio	20 cm (7.9 inches)
DVRS with 7 to 15 Watt XTL Mobile Radio	30 cm (11.8 inches)
DVRS with 16 to 39 Watt XTL Mobile Radio	60 cm (23.6 inches)
DVRS with 40 to 100 Watt XTL Mobile Radio	90 cm (35.4 inches)
DVRS with up to 100 Watt APX Mobile Radio	90 cm (35.4 inches)

Table 2 Minimum Lateral Distance – DVRS (DVR/DVR-LX interfaced to a Mobile Radio)

IMPORTANT

The maximum allowed gain of the $\lambda/4$ omni-directional antenna for the P25 DVR/DVR-LX Repeater is Unity (0dBd).

RF Exposure Label

The RF Exposure Label should be affixed in the vehicle beside the mobile radio control head. The label should be in the direct view of the Repeater operator. The label is supplied with the P25 DVR/DVR-LX Repeater.

FCC Label

This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference, and
- 2) This device must accept any interference received, including interference that may cause undesired operation.

Installation Requirements for Compliance with Radio Frequency (RF) Energy Exposure Safety Standards

ATTENTION!

To ensure compliance with RF Energy Safety Standards:

- Install only Futurecom / Motorola approved antennas and accessories and set conducted power into the DVR/DVR-LX and Mobile antennas equal to or lower than the approved power levels – refer to **Table 3** (Stand Alone DVR/DVR-LX) or **Tables 4-7** (DVR/DVR-LX interfaced to APX Mobile Radios).
- Ensure the antenna installation is consistent with the DVR/DVR-LX Antenna Installation instructions described in this document as well as with the Mobile Radio Antenna Installation Instructions published in the applicable Motorola Installation Manual.
- Ensure the **Product & RF Safety Booklets 8F083X03(FCC) or 8F083X05(ISED)** enclosed with the Mobile Radio and the DVR/DVR-LX are available to the end user upon completion of the installation.

ANTENNA				STAND ALONE DVR/DVR-LX MODEL					
#	Kit #	Freq. Range [MHz]	Type	700 MHz (20W) (up to 50% Tx duty cycle)	800 MHz (20W) (up to 50% Tx duty cycle)	403-430 (20W) (up to 50% Tx duty cycle)	450-470 (20W) (up to 50% Tx duty cycle)	470-512 (20W) (up to 50% Tx duty cycle)	VHF (20W) (up to 50% Tx duty cycle)
1	HAF4016	764-870	¼ wave	20W	20W				
2	HAE6012A	380-433	¼ wave			20W			
3	HAE4003A	450-470	¼ wave				20W		
4	HAE4004	470-512	¼ wave					20W	
5	HAD4006	136-144	¼ wave						20W
6	HAD4007	144-150.8	¼ wave						20W
7	HAD4008	150.8-162	¼ wave						20W
8	HAD4009	162-174	¼ wave						20W

Table 3 Approved Stand-Alone DVR/DVR-LX Combinations

NOTE:

- Mobile RF conducted antenna power in the tables below denotes up to 50% Tx duty cycle.
- DVR/DVR-LX RF conducted antenna power in the tables below denotes up to 50% Tx duty cycle.
- AN and BN models for mobile radios refer to the last two digits of the Model number on the label affixed to the mobile product.

DVR: 7V083X06

Antenna Installation Instructions

IMPORTANT

To assure optimum performance and compliance with RF Energy Safety standards, these antenna installation guidelines and instructions are limited to metal-body vehicles with appropriate ground planes and take into account the potential exposure of back seat passengers and bystanders outside the vehicle.

Selecting an Antenna Site/Location on a Metal Body Vehicle

1. External installation

Check the requirements of the antenna supplier and install the vehicle antenna external to a metal body vehicle in accordance with those requirements.

2. Roof top

For optimum performance and compliance with RF Energy Safety standards, mount the mobile radio antenna per Table B.

3. Trunk lid (DVR/DVR-LX only)

For optimum performance and compliance with RF Energy Safety standards, mount the mobile radio antenna per Table B.

On some vehicles with clearly defined, flat trunk lids, the antennas of some radio models (see restrictions below) can also be mounted on the center area of the trunk lid. For vehicles without clearly defined, flat trunk lids (such as hatchback autos, sports utility vehicles, and pick-up trucks), mount the antenna in the center area of the roof.

Before installing a DVR/DVR-LX antenna on the trunk lid,

- Be sure that the distance from the antenna location on the trunk lid will be at least 85 cm (33 inches) from the rear seat head-rest to ensure compliance with RF Energy Exposure regulations. Do not install the trunk antenna if the distance between the back seat passenger and the trunk mount antenna is less than 85cm.
- Ensure that the trunk lid is grounded by connecting grounding straps between the trunk lid and the vehicle chassis.

4. Mounting restrictions for certain radio models.

NOTE: Do not cut antenna cables to ensure compliance with RF Energy Exposure regulations

- 5. Ensure that the antenna cable can be easily routed to the radio. Route the antenna cable as far away as possible from any vehicle electronic control units and associated wiring.**

6. Check the antenna location for any electrical interference.

NOTE: Any two metal pieces rubbing against each other (such as seat springs, shift levers, trunk and hood lids, exhaust pipes, etc.) in close proximity to the antenna can cause severe receiver interference.

Fig 1 Multiple Antennas Separation for locations 1-10

Fig. 1 indicates the separation distances required for the various antennas used with XTL/APX mobile antennas used with the DVR/DVR-LX antenna. Each "cross-hair" symbol represents a possible location (i.e. LOC) of an antenna. The recommendation is to locate them as close to the center of the roof and/or trunk as possible, without interference with a lightbar. This picture is not drawn to scale. For letters A, B, C, and D, **Table A** indicates the EXACT distance for separation of the LMR antennas. For letters E, F, G, and H, **Table B** indicates the maximum distance between the edge of the ground plane and the accessory antenna location.

NOTE:

- A minimum of 18 inch (46cm) separation is required between lightbar and any roof mounted antennas, to prevent interference with the lightbar circuitry (see lightbar manufacturer's installation information).

Table A - Distance between Antenna

Characters	Distance	Characters	Distance
A	17.7 inches (45cm) (XTL and Non APX8500)	E	8 inches (20cm)
	8 inches (20cm) (APX8500MP)		
B	17.7 inches (45cm) (XTL and Non APX8500)	F	8 inches (20cm)
	8 inches (20cm) (APX8500MP)		
C	8 inches (20cm)	G	8 inches (20cm)
D	8 inches (20cm)	H	8 inches (20cm)

Table B – Antenna Locations for XTL/APX with DVR/DVR-LX

Mobile Products	Antenna Location	
	Mobile	DVR
XTL5000/XTL2500	LOC 2	LOC 5
APX6500/APX7500 ("AN" Model Only)	LOC 1, LOC 3 (Both Single and Dual Bands)	LOC 5
APX8500 MP	Loc 2 (7/800 and All Band)	LOC 5
	LOC 1, LOC 3 (VHF and UHF)	
APX2500/APX4500 ("AN" Model Only)	LOC 2	LOC 5
APX6500/APX6500Li APX5500/APX4500/APX2500/APX1500 ("BN" Model Only)	LOC 2	LOC 5

QMA Connection (APX8500 MP Only)

APX8500 is using a quick disconnect connection called QMA. This does not require any tightening.

- Ensure there is sufficient slack in the antenna cable.
- Ensure that the collar of the antenna cable plug does not bind.
- Engage the QMA cable plug onto the jack, listening for a click to ensure proper engagement.
- Gently tug on the cable to ensure that it is engaged.
- To disengage, pull back on the cable plug's collar and pull the cable straight off the jack.

GPS/GLONASS/Wi-Fi/Antenna Placement (APX8500 MP Only)

Fig. 2 GPS/GLONASS and Wi-Fi Antenna Connector on the Back of the Mid Power Radio

Mobile Radio / DVR/DVR-LX Antenna separation

To ensure interference-free performance when both the Mobile Radio and the DVR/DVR-LX are active, the two antennas must be mounted in such way as to provide 30dB minimum antenna isolation.

Fixed DVRS Site Antennas

Mobile radio equipment is sometimes installed at a fixed location and operated as a control station or as a fixed unit. In such cases the antenna installation must comply with the following requirements in order to assure optimal performance and make sure human exposure to radio frequency electromagnetic energy is within the guidelines set forth in the above standards.

- The antennas must be mounted outside the building.
- Mount the antennas on a tower if at all possible.
- If the antennas are to be mounted on a building then it must be mounted on the roof.
- As with all fixed site antenna installations, it is the responsibility of the licensee to manage the site in accordance with applicable regulatory requirements and may require additional compliance actions such as site survey measurements, signage, and site access restrictions in order to insure that exposure limits are not exceeded.

Temporary-Fixed Site

Futurecom requires the P25 Transportable DVRS (TDVRS) operator to ensure FCC/ISED Requirements for Radio Frequency Exposure are met. It is the responsibility of the Licensee to ensure that the appropriate separation distances between the antennas and bystanders are established and followed to meet the FCC and ISED Maximum Permissible Exposure (MPE) Requirements in any particular Temporary-Fixed location. In situations where a site assessment is not practical, it is recommended that the antennas be located **at least 9 feet from bystanders**. This should ensure MPE compliance in any Temporary-Fixed application and is likely to be a much greater separation distance than is necessary in most cases. Failure to observe the MPE distance exclusion area around the antenna may expose persons within this area to RF energy above the FCC/ISED exposure limits for bystanders (general population).

Approved Antennas and Maximum output power (W) for combination DVR/DVR-LX and APX mobiles for Temporary-Fixed Site

NOTE:

APX mobile RF conducted antenna power in the tables below denotes up to 50% Tx duty cycle.
DVR/DVR-LX RF conducted antenna power in the tables below denotes up to 100% Tx duty cycle.

DVR/DVR-LX

Band	Antenna	Power (W)
