

## **XTL DVR Software – Release 3.42**

**DVR Application Software** – New Version: 3.42; Old version 3.41

**BB DSP:** Version: 1.20 (unchanged)

**TR DSP:** Version: 1.15 (unchanged)

**Tweaker Software:** Version: 3.45 (unchanged)

### **Requires XTL5000 / XTL2500 Firmware Listed Below:**

Host: R20.00.10A

DSP: R19.50.00

UCM R05.07.15

MCH: R16.00.00

CPS: R20.00.00

MACE: R07.11.12

### **New Features / Performance Enhancements:**

Display DVR Serial Number in MSU Test Mode - while in MSU Test Mode DVR Serial Number info is interleaved with DVR Application Software version number.

### **Issues fixed in this release:**

- Affected configuration: MSU on P25 trunking system, DVR on digital channel, PSUs on DVRS enabled channel - DVR is not terminating properly inbound call from distant PSU when nearby PSU turns off or changes channel (sends deregistration request).

### **Known DVR issues in Firmware Release 3.42:**

None.
